ELIASON'S NEXT GENERATION GATE SOLUTION

Why drill holes into your new counters and cabinets to install a gate that you know will eventually fall off anyway?

Competitor Gate Solution

Eliason Gate Solution

The solution is the Eliason Gate and Post System (patent pending) designed for use with any of our custom gate products. The system is strong, easy to install and will work in any gate opening.

Best of all, the system incorporates the reliable Easy Swing[®] hinge, proven over decades to reduce maintenance costs. Eliason gates mounted to our optional gate and post system... we make it easy!

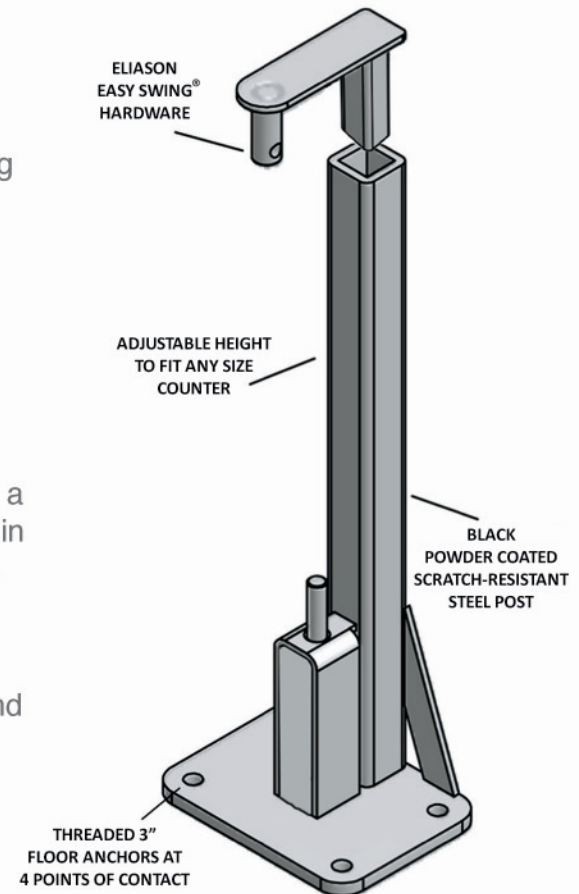

The Eliason Gate[®] and Post System

product **features**
& specifications

For restaurants, food service, convenience stores, grocery stores, pharmacy, photo lab, floral dept, and retail applications

Smart Features – Real Benefits

- Our custom manufacturing capabilities allow us to offer gates of various shapes and sizes custom made for your gate opening all while complimenting your decor.
- Eliason gates attach easily to our patented Gate and Post System instead of your new counter. This unique system minimizes installation and maintenance costs and reduces wear and tear to your counters and cabinets.
- Optimize your investment - Our versatile Gate System features a variable-height post and Easy Swing[®] hardware and is available in singles and pairs, guaranteed to fit any opening width or height (max 42").
- Maximize productivity - Eliason gates are engineered to open and close smoothly in high - traffic areas without impeding passage and they are virtually maintenance free.
